LAMBOO® TENDER R1

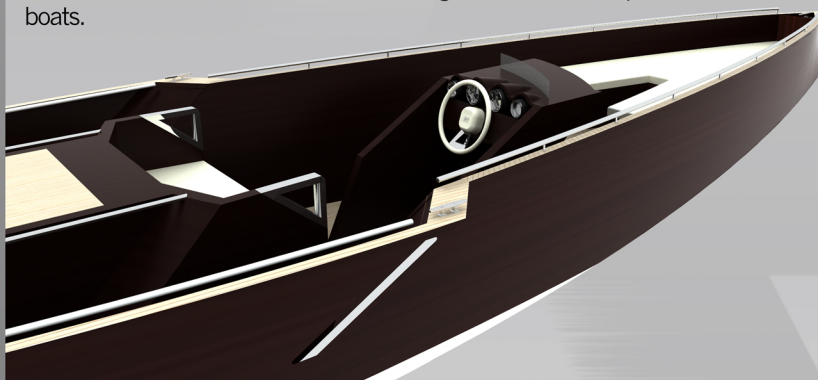

LAMBOO® TENDER R1

Lamboo, Inc. continues its mission to develop innovative bamboo products for the maritime industry by introducing a high performance runabout to the international market. The showpiece LAMBOO® TENDER R1 is a small vessel designed as a yacht tender to ferry supplies and passengers to and from port. The innovative design of the LAMBOO® TENDER R1 combines the sleek modern designs of Sigmund Yacht Designer Peter Symonds with the sustainability and performance features of engineered bamboo components. The LAMBOO® TENDER R1 will be equipped with the latest propulsion technology with its Steyr hybrid turbo diesel engine and state of the art navigation, electrical and LED lighting systems. The truly innovative integration of these materials and systems makes this tender a cutting edge showcase for the nautical market.

Lamboo is currently supplying premium products into the maritime building industry for a variety of applications including hull construction, interior paneling, decking, furniture, and cabinetry.

Sigmund Yacht Design is a leading Austrian yacht and tender design studio specializing in exterior design, interior design, yacht layouts, and 3D visualization. Their award winning designers offer the best in advanced design, styling, and consulting along with professionalism, discretion, and flexibility.

Cockwells Modern and Classic Boatbuilding is known for its expertise with wood and modern composites used to create custom-built boats.

SPECIFICATIONS

LOA: 7.72 METERS
BMAX: 2.4 METERS
DRAFT: 0.45 METERS
DISPLACEMENT: 1600 KILOGRAMS

STANDARD MOTOR OPTION

STEYR HDS™ HYBRID DRIVE SYSTEM

The environmentally friendly HYBRID SOLUTION marks a new chapter in the history of pleasure boat propulsion systems. It not only assures zero emission and low speed manoeuvring in harbours, noiseless drive on inland waters and nature reserves, but also eliminates the need for separate generator units for other onboard equipment. The "zero emission" electric drive mode allows a speed of 5 knots using solely electric propulsion and switches to the combustion engine with an easy turn of the ignition key. The ingenious propulsion then gets "boosted" by the electric drive and enables quicker acceleration, lowering fuel consumption, improving response and dynamics.

Steyr HDS™ Units are Award Winning:
IBEX AWARD, MIAMI, USA – by the NMMA
DAME AWARD, Amsterdam, Europe – by METS

Steyr SE 6-cyl. outfitted with HDS™ unit

Drive:	Diesel-Electric Parallel Hybrid
Output [crankshaft] kW (HP):	140 (190)
Rpm at full load:	3050 - 3550
Cylinders:	6 in line
Displacement [cm3]:	3200
Max. torque [Nm]:	445
at speed [rpm]:	2300
Rating:	P/HO/INT/MCD
Weight (motor+HDS unit)[kg]:	400
Injection system:	Two Stage Unit Injectors

STEYRMOTORS

INNOVATION WITH LIGHTNESS
